ABOUT ME

Name	Cristina Rodriguez
Address	Seattle, WA
Languages	English, Spanish

WORK — 10+ years of experience

Currently — Software Engineer Freelance

I'm working remotely with a project-oriented focus on different agencies like Bnomio.mx. Some of the projects are relatable to databases, Api's, and client-specific React components.

2013-2015 Project Manager Vinco Orbis S.A
The lead of the Python Team. Commited to on-time delivery and support of new task related to the maintenance work of the projects using Agile

2011 - 2012 National Council for Culture. Created business opportunities with new clients by developing their ideas of projects

2011 Marketing Ecodigital Agency
Supported six different digital campaigns of marketing, implemented strategies, optimized websites, improved the user experience

2007-2010 Communications Financiera Rural
Journalist of the team of the communications office at Financiera Rural. In charge of the webpage www.financierarural.gob.mx where the material produce for the Office was published

2005 - 2007 Content Manager Cyclelogic
Content manager for mobile marketing campaigns. Responsible for managing contacts with publishers and editors, for copyright managment

Different paths to became a software engineer
Women Who Code Merida 2018

PERSONAL

I am an Android Developer with a background in journalism and communications. I have a year of experience building apps for Android using Java and Android Studio connecting with databases and APIs and focusing on the user experience trough UI/UX. Five of those apps are available for download at the Google Play Store.

In 2017 I decided to change my path from communications to software engineering. I graduated as a Fellow Software Engineer at Hackbright in San Francisco (May 2017). In 2018 I was a recipient of the Grow Scholarship fro Google and Udacity for Android.

I like the problem-solving aspect of being a software engineer, and I enjoy using all my research skills to find the answer to any new challenge in the development of a project. I am passionate about building projects from scratch, and I bring to the table my detail-oriented, project management and programming skill set. Before changing my career, I had over 12 years of experience in communications managing strategies and contacts with the press for big companies, and developing public events.
